Ai (愛)

is a one-person design studio based in Nashville, TN. Focused on eventually overtaking the world and becoming a multinational designer, its proprietor, Jessica Cantlope, seeks to further improve this beautiful blue planet with the aid of efficient design. Persnickety about placement? Concerned with color? Ai's designs have strength and backbone, able to be applied in many different contexts, whether it be print or web. Fortunately for you, web is its specialty.

This is Ai's catalog of web templates, ready to be personalized and made-up just for you!

Note: All layouts in this catalog are uniquely coded and *also* available in Wordpress (except for "Cawntent", which is exclusively non-Wordpress).

Corporate

Sometimes you've simply got to take a corporate approach to things. People expect one to present oneself a certain way when you're in a corporate environment; websites are the same way. But why not shake it up a little? There's beauty to be found in all corners of life, no matter how serious or bureaucratic.

HEADER TEXT

This large, versatile **widescreen** layout works for corporate websites, displaying images for portfolio or ecommerce needs, and sets of information, all which require more vertical screen space than horizontal. Great for landing pages. Fixed width with no more than 6 top-level navigation links suggested. Fits comfortably into 1280-pixel-wide screens.

Sed ut perspiciatis unde omnis iste natus error sit voluptatem accusantium doloremque laudantium, totam rem aperiam, eaque ipsa quae ab illo inventore veritatis et quasi architecto beatae vitae dicta sunt explicabo. Nemo enim ipsam voluptatem quia voluptas sit aspernatur aut odit aut fugit, sed quia consequuntur magni dolores eos qui ratione voluptatem sequi nesciunt.

But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain was born and I will give you a complete account of the system, and expound the actual teachings of the great explorer of the truth, the master-builder of human happiness. No one rejects, dislikes, or avoids pleasure itself, because it is pleasure, but because those who do not know how to pursue pleasure rationally encounter consequences that are extremely painful. Nor again is there anyone who **loves or pursues** or desires to obtain pain of itself, because it is pain, but because occasionally circumstances occur in which toil and pain can procure him some great pleasure. To take a trivial example, which of us ever undertakes laborious physical exercise, except to obtain some advantage from it? But who has any right to find fault with a man who chooses to enjoy a pleasure that has no annoying consequences, or one who avoids a pain that produces no resultant pleasure?

SIDEBAR 2

Fusce sed sem felis. Etiam sem risus, consectetur vel sollicitudin vitae, egestas id sapien. Nulla ut leo turpis.

Cras a lectus ut risus mollis congue. Aliquam condimentum arcu porta arcu malesuada sit amet **molestie dolor** aliquet. Vivamus a sapien quis risus euismod sollicitudin ut id odio.

■ Blog

Everybody has something to say! But nobody is going to listen unless it sounds good. Likewise, nobody is going to read unless it looks good, especially online, so clean and simple layouts with emphasis on type should be a priority. In this world of Web 2.0, people embrace ease of operation and simplicity—not to mention readability—so there should be no exceptions when it comes to blog design.

Design

Finally, a section for the artists. They are equally as sensitive about the presentation of their work; should it be as minimalist as possible to draw all attention to the centerpiece, or should it be as lively and animated, almost an extension of the work itself? One way or another, it can be done, and joyfully so; but even the most complex and graphical layouts start somewhere as simple grids and compositions.

On the side there can be smaller logos, fewer top navigation links, and thumbnails to load content into the side. It can also be positioned on the right. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

HEADER TEXT

This layout was inspired by many Japanese-style frame-based art portfolio websites. It's ideal for image-based layouts or even just simple design or product presentation. It uses divs only. The content area is 700 pixels wide in order to maintain shape within smaller resolutions, and the background fills up the browser window. The sidebar can be utilized for this layout in many ways; content could be loaded in this area from it. Ideal for around five top-level navigation links.

All featured web layouts, to the best of my knowledge and testing, are functional in major & minor browsers, current and (mostly) older. All are coded with clean and valid XHTML5 and CSS3. For some, light jQuery is used. For live demos, please contact Jessica to set up a meeting or interview at ai@jessicacantlope.com.
